

# ORCHID Walkabout KWG

The Orchidaceae family is the largest and most successful in the world and many terrestrial species are growing in Ku-ring-gai Wildflower Garden and they emerge and flower at various times in the year. They are monocotyledons with three sepals and three petals, but one of the petals in most species is greatly modified to form the labellum or tongue. Fuller descriptions of these plants can be found in “notes” on our Walks & Talks page Australian Plants Society North Shore Group website: <https://austplants.com.au/North-Shore/> Detailed botanical descriptions are given on the PlantNET website: [plantnet.rbgsyd.nsw.gov.au](http://plantnet.rbgsyd.nsw.gov.au) Excellent images can be found on the Hornsby Library website: [www.hornsby.nsw.gov.au/library](http://www.hornsby.nsw.gov.au/library) under heading: eLibrary then find Hornsby Herbarium.

*Acianthus  
pusillus*  
Autumn-Winter

*Acianthus  
caudatus*  
Winter

*Caladenia  
alata*
